Master Precertification List - Removed Codes

For Health Care Providers

July 2026

***This list identifies the codes that required precertification at any time within the last 24 months. The date each code was removed from precertification is also noted. Please reference the current published Master Precertification List for all codes that currently require precertification.**

Complete/PHS+ - The most comprehensive care management model that includes all the components of our Preferred level, plus additional digital tools and the highest level of engagement and potential savings.
Preferred - A comprehensive care management model that includes all the components of our existing care management model, including comprehensive outpatient precertification, plus higher intensity of care coordination and more customer engagement opportunities.
Basic Standard - A lower touch care management model that includes many of the components of our existing care management model, such as higher intensity of care coordination and more customer engagement opportunities. Basic Standard has a limited number of outpatient precertification categories (radiation therapy, medical oncology, medical injectables, home infusion therapy and private duty nursing), fewer than our Preferred and Complete solutions.

*** Code may be delegated to EviCore for precertification management for certain clients.**
