INSTRUCTIONS FOR USE

*Cigna's Reimbursement policies are intended to supplement certain **standard** benefit plans issued or administered by Cigna or a Cigna affiliate. As such, these policies are to be administered only by operating subsidiaries of The Cigna Group or their authorized representative(s) and any use or distribution outside of this scope is prohibited unless explicitly authorized in writing by Cigna.*

Please note, the terms of a particular benefit plan document [Group Service Agreement (GSA), Evidence of Coverage, Certificate of Coverage, Summary Plan Description (SPD) or similar plan document] may differ significantly from the standard benefit plans upon which a reimbursement policy is based. In the event of a conflict, Cigna or its authorized representative will apply the terms of the applicable plan benefit document. Further, reimbursement terms in agreements with Cigna's participating health care providers may also supersede the information in a reimbursement policy.

Overview

These Reimbursement policies do not constitute medical advice, clinical protocols, or treatment recommendations and should not influence or replace the independent clinical judgment of healthcare professionals in the care of individual patients.

Ambulance transportation services involve the use of specially designed and equipped vehicles used for transporting ill or injured patients that may involve ground, air, and/or water transportation in both emergency and non-emergency situations.

This policy outlines the reimbursement criteria for each level of transportation.

Reimbursement Policy

Cigna will provide reimbursement for ground emergent licensed ambulance transport for the following:

- A medical emergency to the nearest available provider or facility where the required medical care can be administered.
- When emergency ambulance transfer is required from a facility that is not equipped or staffed to treat the patient's specific injury or illness to the nearest appropriate facility where the required medical care can be provided (e.g., neonatal transfer from birthing community hospital to regional NICU equipped facility).

Cigna will provide reimbursement for air (fixed wing or rotary wing)/water ambulance transport, when basic or advanced life support is required, and land ambulance is not clinically appropriate, or land ambulance transportation is not feasible and one of the following criteria is met:

- Emergency air/water transport to the nearest available facility is required for a medical emergency, and the point of pickup is inaccessible by a land vehicle.
- Emergency air/water transport to the nearest available and appropriate facility is required as a medical emergency and distance or other obstacles make transportation by ground ambulance not feasible.
- Air/water transport is required from a facility that is not equipped or staffed to treat the patient's injury, trauma, or condition to the nearest appropriate and available facility where the required medical care can be provided, and standard ground ambulance transport would impede timely and appropriate medical care.

Non-emergent licensed ground ambulance services are reimbursable IF either:

- The origin or destination of the non-emergency ambulance transport was to or from a hospital (identified by the ambulance modifier H) or
- An HH modifier is utilized, the requested non-emergency service is a covered benefit.

Non-emergent licensed ground ambulance services that are not reimbursable include the following:

- When the H modifier is not utilized in either the origin or destination of the transport is not identified

Ambulance transportation codes may require precertification. A complete listing of services requiring precertification or notification can be viewed on Cigna for HealthCare Professionals at www.Cignaforhcp.com > Precertification under Popular Links.

Cigna does not provide reimbursement for the following ambulance and other transport services (this list is not all inclusive):

- Cigna will not reimburse more than 1 unit per trip (each way)
- Transport to and/or from a physician's office for a routine visit
- Transportation between health care facilities, when transfer is solely due to the preference of individual/family member/caregiver/physician
- Transfer from one residence to another
- Charges for unloaded miles (i.e., miles traveled without the individual on board)
- Waiting time charges (i.e., time spent waiting for the individual)
- Transportation from a non-licensed ambulance which includes but are not limited to wheelchair van, chair car, taxi, automobile, private or commercial air travel, bus and minibus service
- Hospital system intra-facility transportation for the purpose of performing specific diagnostic or therapeutic procedures when the patient is not actually discharged from the first hospital and re-admitted to the second hospital
- Ancillary transportation fees (e.g., parking fees, tolls, meals and lodging)
- Cigna does not provide separate reimbursement for services and supplies provided during ambulance transportation as they are included in the ambulance transportation payment.
- Cigna does not provide separate reimbursement for the following HCPCS T status codes: T2001, T2002, T2003, T2004, T2005 and T2007 with or without the use of the origin/destination modifiers.

General Background

Ambulance services typically involve the assessment and administration of care to an ill or injured patient by specially trained personnel. The transportation of the patient in specially designed and equipped vehicles within an appropriate, safe and monitored environment. Ambulance services must have the necessary permits and licenses in compliance with all the local, state and federal laws and regulations.

Guidance from the Centers for Medicare & Medicaid Services (CMS) may be referenced by Cigna for informational purposes only and is not incorporated in full.

Transport for Transplant Coverage

Air ambulance transportation for a transplant event is a covered medical benefit when it is the most effective means of transporting an individual to a Cigna LIFESOURCE Center of Excellence. The time-critical procedure and important circumstances prevent alternative

modes of transportation. Air ambulance transportation provided solely for the convenience of the participant is not covered.

Ambulance Modifiers – Billing Requirements

In alignment with CMS guidelines, providers are required to report on service units in each ambulance trip provided during the billing period. Therefore, the service units for each occurrence of these HCPCS codes (see Coding/Billing Information section for applicable codes) are always equal to one.

- Only one trip per claim line will be reimbursed.
- Two lines are required for submission; a mileage code and transport/service code must be reported.

Each ambulance modifier is comprised of a single digit alpha character identifying the origin of the transport in the first position, and a single digit alpha character identifying the destination of the transport in the second position.

A valid origin and destination as well transportation modifiers are required. Cigna may request supporting documentation to confirm appropriate use of the required modifiers and services provided.

- Example: RH (residence to hospital)

D	Diagnostic or therapeutic site other than –P or –H when these are used as origin codes
